Name _____

Date _____

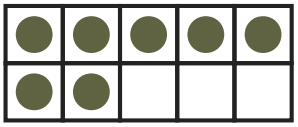

Year 1 Maths

Number bonds to 10.

I can use number bonds to 10 to add and subtract.

1 Practise

Fill in the missing numbers.

How many more to make 10?

☐

4 + ☐ = 10

10 – 6 = ☐

5 + ☐ = 10

☐ + 2 = 10

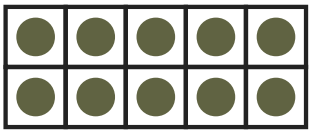

10 – ☐ = 1

8 + ☐ = 10

2 Use It

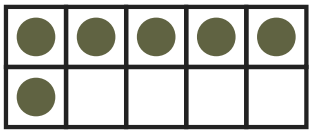

Use the tens frame to help you. Write the answer in the box.

There are 10 biscuits. Sam eats 3. How many are left? Cross out the ones he eats.

☐

I have 6 stickers. How many more do I need to have 10?

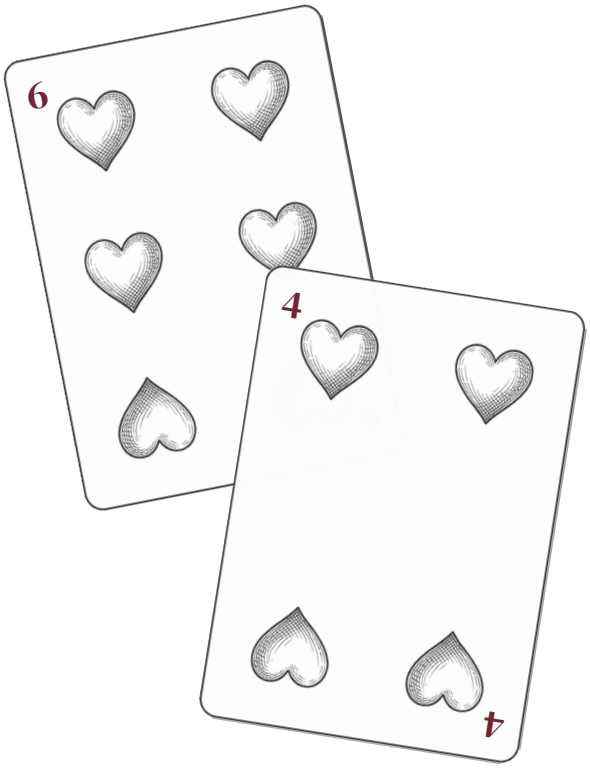

☐

3 Spot The Mistake

Ella says 3 + 6 = 10. Is she right? Write it correctly.

☐ + ☐ = ☐

☆ Challenge

How many different pairs of numbers make 10? Write one pair on each line. Start with 0 + 10.

☐ + ☐ = 10

☐ + ☐ = 10

☐ + ☐ = 10

☐ + ☐ = 10

☐ + ☐ = 10

☐ + ☐ = 10

How do you know you have found them all? Tell your grown-up.

LEARNING

Year 1 Maths

For grown-ups: how to help, and the answers.

How To Help

- Use fingers: show 7, and ask how many fingers are folded down. That is the bond to 10.
- An egg box with 10 spaces makes a great ten frame. Fill some and ask how many are empty.
- Play quick-fire pairs in the car: you say 4, they say 6.

Practise

1. 3
2. 6
3. 8
4. 4
5. 9
6. 5
7. 2

Use It

1. 7 biscuits
2. 4 more stickers

Spot The Mistake

1. No. 3 + 6 = 9, or 3 + 7 = 10.

Challenge

1. 0 + 10, 1 + 9, 2 + 8, 3 + 7, 4 + 6, 5 + 5: six pairs, one for each line. 6 + 4 is the same pair as 4 + 6 swapped round. Working in order from 0 shows none are missed.
